

**Sculptured Collection** is now meeting the demand for sustainable products by offering E1 and CARB (California Air Resources Board) compliant panels with no added urea-formaldehyde. The ultra-textured MDF panels are all boldly incised for dramatic impact as a strong signature statement in any environment, available primed for painting or unfinished. Following responsible manufacturing practices, the collection is packaged in 100% recycled cardboard.

Enhancing **Sculptured Collection** is **Vy-CLAD™ Sculptured Panels**, a collection of high-performance, thermoplastic foils that are available in a wide range of patterns, including wood grains, metallics, textures and solid colors in either gloss and matte finishes to provide a solution-based product for the most demanding contract projects.
