### BuildingBlocs™

Introducing **BuildingBlocs™** — another *new-to-the-world* product by modularArts®. Stacked along with standard steel studs at 24" centers, they create fully dimensional, double-sided, rock walls. Our proprietary **InterlockingRock®** feature precisely aligns all sides for super fast installation. And as with all our products, you can *breathe easy* — blocks are composed of cast gypsum with a lightweight soy-based core, for healthy, fire-safe walls.

A modularArts module is like a genome. We carefully encode an elegance that's revealed in the greater whole of joined panels, tiles, or blocks. In each module, we embed a larger perspective. This ensures that the wall becomes greater *than the sum of its parts*.

(Design shown: Deano™)
