KEEPING IT GREEN

Architectural Systems Inc. launches Eco-Porcelain

Architectural Systems Inc. (ASI) ASI Eco-Porcelain™ is an expanded collection to ASI Stone, made from recycled, low-emitting, 100 percent natural materials, following responsible manufacturing processes. This porcelain collection is available in an extensive palette of neutrals and

bright colors, and finishes and textures, including matte, polished and honed. The tiles are offered in various sizes, with a standard thickness. High performing, durable, stain, moisture and odor resistant, ASI Eco Porcelain is an ideal "green" flooring solution for commercial environments.

Orchid products are
Greenguard certified

The GREENGUARD Environmental Institute (GEI) has awarded Orchid Ceramics certification for Indoor Air Quality for its ceramic floor, wall and porcelain products, indicating that they meet the strict requirements for low chemical emissions in homes, businesses and commercial buildings and will not contribute to indoor air pollution.

Poor indoor air quality can lead to allergies, asthma, reproductive and
