## Rev-A-Shelf 448 Wall Series

Functional and organized wall cabinets are now possible with Rev-A-Shelf's New Wood

Classic Adjustable Shelf Wall Pull-Out. With birch/maple wood construction and chrome rails, the 448 Wall Series has numerous features including three adjustable shelves and a bonus chrome rail set that can be mounted to

the top shelf of the unit providing up to five surface areas for taller 36- or 42-in. applications. The 448 Series utilizes the advanced patent-pending "tri-slides" and is available in two sizes for wall 9 and wall 12 cabinets.

## Architectural Systems Ecotextures

Ecotextures architectural panels, from Architectural Systems are crafted from environmentally friendly OSB (oriented strand board) products. Rapidly renewable timber is used to create a durable, shrink-resistant material ideal for millwork, feature

walls, column covers, fixtures and furniture. Ecotextures are easy to install, engineered in varying panel sizes that interlock for a seamless finish. Four standard colors are available in addition to a natural, unfinished surface that can be stained on-site. Custom factory finish is also available.
