3 Susan G. Komen for the Cure's Holiday House, New York, NY • Dankner Design • Featuring Sculptured™ Collection — Primed MDF with custom color — WPMAS005

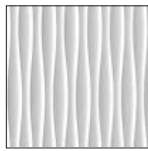

# Sculptured™ Collection

ASI was the first to market the Sculptured™ Collection in North America, and is now meeting the demand for sustainable products by offering E1 and CARB (California Air Resources Board) compliant panels with no added urea-formaldehyde. This enhanced Sculptured™ Collection follows responsible manufacturing practices and is packaged in 100% recycled cardboard. The collection is available through a cost effective, quick ship program for contract interiors. The **in stock**, ultra-textured MDF panels come off the shelf already primed - all boldly incised for dramatic impact. This product asserts itself as a strong signature in any environment, uniting personality with practicality. Please note that variations in color and texture may occur due to the nature of the material. For updates and complete collection offerings and specifications, please visit [www.archsystems.com](http://www.archsystems.com).
