

ASI welcomes our new relationship with Veritas™, engineers of the luminous, customizable **ResinArt™** panels. With a beautiful array of textures, interlay materials and colors, this popular product collection, available through a quick ship program, elevates design to a new level. Each panel is constructed of PETG made with a minimum of 40% pre-consumer material fulfilling a sustainable requirement. And coming soon... an ASI custom collection, distributed globally! Please note that variations in color and texture may occur due to the nature of the material.
