

# FEATURED PROJECT

Architectural Systems is focused on wellness in the New Year and this month's featured project is **Concentric Health Experience**, an agency that builds brands that create positive health experiences. **Beckman Studio Design/Build** was approached to redesign and build out the growing company's corporate office space. The project was centered around building small, open ceiling private conference rooms that would incorporate materials that were both sound attenuating and inviting.

**Thomas Beckman**, principal, and **James Sabo**, Director of Finishes, incorporated the **Eco-Dimensions Bamboo Wall Panels**, using three different patterns throughout, each painted in one of the company's signature colors to designate the unique conference rooms.

*"Architectural Systems has everything you need. Being on the mailing list keeps our studio abreast of new products and the ASI showroom has more than you could imagine! To be able to go into a place and walk away with ASI Tote bags full of samples instead of spending time searching multiple sources online made the day a lot easier."*

- Thomas Beckman, Principal and James Sabo, Director of Finishes
