

As we are on the way to our next destination - for work or pleasure - the jetsetter in all of us is grateful for improved airline cuisine, thanks to airline catering companies including the world's largest, LSG Sky Chefs.

This month Architectural Systems is all about summer eateries and in the spirit of **#DiningandDesign** our featured project is LSG's new state-of-the-art facility food preparation facility located in Des Plaines, IL. The first LEED® certified airline catering kitchen in the world includes a glass entry façade with a custom glass elevator. The grand staircase located in the main lobby showcases **Crossfuse® Wood Panels**, complementing their dedication to culinary cuisine and sustainable building excellence!

Crossfuse® Wood Panels is the next generation of the award-winning **Fusión Wood Panels**. A myriad of handcrafted three-dimensional patterns that are defined by masterful construction and exceptional design. This eco-friendly collection is comprised of 4x8 reclaimed wood veneers. Patterns and species are interchangeable and are also available in HPL laminates over MDF in additional inspired options for material surfaces.

Have a project featuring Architectural Systems' award-winning materials? Share your project photos on **Facebook** or **Instagram** using **#TeamASI**, or email **TeamASI@archsystems.com** - it's not too late to take home the ASI Olympic Gold Medal!
