

EcoDomo's The Rainforest Collection is a 2 mm recycled leather surface for floors and walls made from pulverized leather fibers extracted from car seats and other leather tanneries. A member of the United States Green Building Council since 2005, EcoDomo develops, manufactures and designs sustainable and luxurious architectural details. While EcoDomo's first collection consisted of recycled leather tiles, the company has since become expert in leather surfacing and applies recycled and hide leather to a variety of substrates and formats. The Rainforest Collection leathers are available as sheets, tiles, laminated panels or floating floors (www.ecodomo.com).

3form's Pattern+ is a revolutionary glass customization system that works across multiple material platforms. These new offerings provide more creative options with completely customizable patterns in etch or color with no minimum order quantities. Select from a variety of patterns, textures and colors. Designers can now achieve nearly any look, any color and infinite possibilities from many dynamic materials to tailor their concepts for their multifamily clients (www.3-form.com).

Fiberon's Horizon composite decking emulates exotic, tropical hardwoods with dramatic striking looks. With Fiberon's innovative patent-pending PermaTech® surface technology, Horizon features a 25-year, industry first, stain and fade warranty. Capped on all four sides, Horizon provides beautiful, long-lasting, low maintenance decking. Reversible boards offer varied wood grains for a more natural look. Horizon resists stains, mold and mildew, and it's easy to clean (www.fiberondecking.com).

Architectural Systems Inc. (ASI) has introduced Chroma Wood Panels, a vibrant collection of deep saturated hues and pops of color crafted from the ancient Japanese charring/antiquing technique called Shou-sugi-ban. Offered in Cypress, Yellow Pine or Redwood species in random length planks and made in the USA, this unique material is also available in custom colorations bridging traditional and contemporary design—and it's ideal for interior and exterior applications. According to Ron Jackson, CEO of ASI, Chroma Wood Panels is one of the most innovative surfaces ASI has brought to the market in 25 years (www.archsystems.com).
