

ASI | Architectural Systems features the Fogo de Chão restaurant located in Pittsburgh, PA. which offers authentic Brazilian cuisine. Known globally for their churrasco, the art of roasting high-quality cuts of meats over open flame, all of which are then carved tableside by Brazilian-trained gaucho chefs. The expansive bar with a panoramic view embodies the culture of this Brazilian Steakhouse when entering the space.

Fresh Food and Mixology

“ There are currently 52 locations throughout the world, and all the locations contain several focal points, one of the most prominent being their Bar Fogo area. The intent was to create a dynamic and impactful design to engage customers.

The gold lacquer dimensional and textured panel in the Expressionism - Jewel pattern from the [Embossed Wood - Geometrix Collection](#) gave us the ‘wow factor’ they look for in each restaurant !

Creativity & Collaboration

We are grateful for our partners at ASI who have extensive product knowledge and customer support, helping to create a successful project. We look forward to continuing our partnership on other projects.
